CALL FOR FILMS

Let's make a Film Festival

We want to celebrate an intercultural film festival – and have called it Polyloid. It could be translated „Lots of movies“. Behind it are also the people with their diverse life stories and also the tales of suffering who live in Leipzig's East. Films tell such stories sometimes funny, sometimes exciting, sometimes dramatic and sometimes even a little about ourselves. We don't want to write film history, but tell stories from many countries with films.

Help us and suggest three films from your home country:
