

**\*UPDATED\* Cat Show: Social Media Release re Carly 06/07/2018**

*Start Release statement*

“

Help get Carly back to showing Cats!

Until the end of 2018 all screening fees & proceeds from vimeo on demand sales will go directly to Carly, star of [CAT SHOW](#).

In October last year, Carly had a major spinal fusion operation to straighten up her back and minimise the effects of a genetic disease called Scoliosis.

Because she is young, surgeons tried to preserve the last disc in her back, but within the space of 9 months, it has worn out and the screws that hold the rods in place to hold her spine together are coming out. More surgery may now be needed to fuse the whole spine and pelvis into one.

As a proud independent young woman Carly is determined to keep up her job working as a health care professional as much as she can, but it's understandably a challenge to physically keep it up let alone take care of her beloved cats or continue her passion for showing and breeding pedigree cats.

Any funds raised would first go towards her cats, making sure they are well taken care of while she is in hospital. Then towards Carly's recovery to help get back on her feet to care for them well enough to have them home with her again. Anything left over would go towards any equipment needs she has, as after the operation she will need specialist seating and sleeping.

It's not fun to bring sad news, but the good news is that if you want to help Carly, all you have to do is buy or rent [Cat Show](#) via Vimeo on Demand.

This small gesture of kindness will make a big difference to help Carly get through this really difficult period.”
